

Checklist - Pool - Opening

This is an example checklist to walk through pool opening steps.

Checklists are a great way to start any service job, ensure all steps are completed, document any notes or issues and communicate to your client and back office. They also help any seasonal or new employee finish each job without missing a beat!

- > Drain the water and remove Debris from the winter cover

Notes:

- > Remove, clean and store cover on client's property

Notes:

- > Assemble Filtration equipment including pumps, filter, heater and chemical feeder

Notes:

- > Install ladders, handrails and diving boards

Notes:

- > Start filtration equipment and check for proper operation

Notes:

- > Advise on any repairs, upgrades or maintenance

Notes:

- > Check balance water chemistry

Notes:

> Rinse deck of loose debris (pressure wash quote available)

Notes:

> Vacuum, brush and skim pool

Notes:
